### Malaria Vaccine

Malaria remains a primary cause of childhood illness and death in sub-Saharan Africa. More than 2,60,000 African children under the age of five die from malaria annually. WHO recommended RTS,S malaria vaccine to be used for the prevention of malaria caused by of *P. falciparum* in children living in regions with moderate to high transmission. RTS,S malaria vaccine should be provided in a schedule of 4 doses in children from 5 months of age.
